The Control Panel

1. Turn wall mounted monitor on and off. Be sure to turn the monitor off at the end of use.

2. Volume control for audio.

3. Select to have desktop computer be viewed on wall mounted monitor.

4. Select to have laptop or other portable device, that is connected through the HDMI plug, be viewed on wall mounted monitor.

5. Not used at this time.

6. Mute – Blacken the monitor screen while setting up the computer. This function allows a user to work on the computer without anyone seeing it on the wall mounted monitor.
